Everest Steel – Design, manufacture and distribute iron and steel products in Southern Africa.

Main Products – Manhole Covers, Grates and Frames, Roof Drains for Building Construction and Pipe Jointing Systems for Shouldered Steel and PVC Pipe

ABOUT US

Everest Steel is a South African Manufacturer, Stocklist and Distributor of a wide range of iron, steel, mining, agri and civil (municipal) infrastructure products.

We supply manhole covers and frames designed to meet traditional Southern African specifications, As well as high strength anti theft ductile iron manhole covers and frames manufactured to international EN124 standards.

Southern African produced supplemented with Imports from internationally certified manufacturers that comply with international and South African quality standards.

OUR HISTORY

Everest Steel, founded through years of manufacturing and engineering experience and knowledge of iron and steel products and components for Southern Africa Markets.

Established in 1987 Reliance Foundries started Production 1995 of SABS Manhole Covers, Storm Water Grids, Meter Boxes and other Cast Iron Infrastructure products for the Southern African markets. Since 1995 Reliance Foundries supplied +- 25000 tons of Manhole Covers and Frames in the Southern African Markets to the SABS specifications.

In 2010 the Reliance Group a regional Iron and Steel producer in Botswana established Everest Steel specializing in fittings for shouldered pipe systems.

In 2014 Reliance Foundries appointed Everest Steel as the only Distributor of the various Reliance Foundries infrastructure product ranges, manhole covers and grates

In 2014 Everest Steel established an additional supply chain from Producers in India on Manhole Covers and Frames and Pipe Jointing components to South African Standards and Everest Steel owned designs.

2023 Everest Steel added an additional supply chain in China for ductile iron covers and frames to Everest Steel Designs and South African and International Specifications.

LOAD RATINGS

DUCTILE RATINGS

Class A15

Covers and grates of this class are capable of withstanding 15kN (~1.5 tonnes) test load which can be used in pedestrian areas and by pedal cyclists.

Class B125

Car parks and pedestrian areas where occasional vehicle access is likely.

Class C250

Covers and grates of this class are capable of withstanding 250kN (~25 tonnes) test load.

Class D400

Carriage ways, hard-shoulder where cars and lorries have access.

Class E600

Covers and grates of this class are capable of withstanding a 600kN (~60 tonnes) in test loading areas, docks, aircraft pavement

Class F900

Covers and grates of this class are capable of withstanding a 900kN (~90 tonnes) in test loading areas, docks, aircraft pavements.

CAST IRON RATINGS

Pedestrian

Covers and grates of this class are capable of withstanding 15kN (~1.5 tonnes) test load which can be used in pedestrian areas and by pedal cyclists.

Light Duty

Car parks and pedestrian areas where occasional vehicle access is likely.

Medium Duty

Covers and grates of this class are capable of withstanding 250kN (~25 tonnes) test load.

Heavy Duty

Carriage ways, hard-shoulder areas where cars and lorries have access.

EVEREST STEEL STANDARDS

- Manhole covers and grates Manufactured and tested SANS558, SANS1115, SANS50124 specifications & Standards
- All our products comply with Dimensional, Weight, Metal Grade & Load Carrying requirements per SANS Specifications & Standards
- Regular Mechanical & Chemical Analysis is performed during production with load & Strength tests
- Metal Grades are tested during melting to international requirements

RF – Rain-Flo Range of Manhole Covers & Frames – SANS558

RF – Rain-Flo Range of Storm Water Grate & Frame – SANS1115

RF – Rain-Flo Range of Rainwater Square Dish & Frame – SANS1115

RF – Rain-Flo Range of Valve, Stopcock & Meter Boxes – SANS558

RF – Rain-Flo Range of Roof Drains

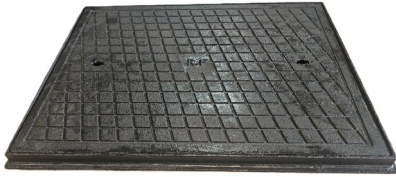

RF – Rain Flo Ductile – EN124

ES – Range Shouldered Pipe Jointing Fittings to – SANS815
